**DIGITAL  
METAL**

SMALL IS THE NEW  
**BIG**  
IN ADDITIVE MANUFACTURING

**No 2, 2019**  
A newsletter from Digital Metal® about the possibilities within high-precision binder-jetting

## From unique components to mass production

Digital Metal's fully automated no-hand production concept, where the majority of the process steps will be handled by a robot, takes 3D-printing a giant step towards cost-efficient mass production. We already produce up to 50,000 components each year. Since the binder-jetting net-shape technology doesn't require any supports during printing, it is ideal for cost-efficient production. [Learn more](#)

**Cetim installs a second Digital Metal® printer**

Digital Metal®'s unique binder-jetting technology continues to generate great interest in the AM field. Cetim, the French Technical Centre for Mechanical Industry, was one of the first customers to install a Digital Metal printer in its Saint-Étienne facility in 2017. Now Cetim in Cluses has just installed another Digital Metal printer.

“Digital Metal’s technology offers great potential for metal AM productivity and capability”, says Thierry Gautreau, responsible for Industry 4.0 and Company Transformation Support at Cetim Cluses. “The first printer installed by our sister company in Saint Étienne has met all our expectations. So now we are really looking forward to helping our customers implement this technology and thereby help them sharpen their competitive edge”. [Read the full release here](#)

### **Vote for Digital Metal in the 3D Printing Industry Awards**

This year, Digital Metal is nominated as “Innovation of the Year” in the 3D Printing Industry Awards. If you share our enthusiasm for this outstanding 3D printing technology, support us by giving us your vote here. [Go to class 13](#)

---

### **Becoming an industrial standard**

The number of industrial companies embracing Digital Metal’s unique 3D printing technology is constantly growing. From prototyping and production of complex individual products to mass production, binder jetting provides a range of advantages. [Let us show you how you can benefit](#)

### **Upcoming events**

Meet the Digital Metal team and learn more about our technology at the following events:

[Rapid + TCT, 21-23 May 2019, Detroit, Michigan, USA](#)  
[MedtecLIVE 2019, 21-23 May 2019, Nürnberg, Germany](#)  
[3D PRINT Congress & Exhibition, 4-6 June 2019, Lyon, France](#)
