A newsletter from Digital Metal® about the possibilities within high-precision binder jetting

## **Launch of two new superalloy materials**

Following multiple request from large companies within aerospace and automotive Digital Metal® now launches two new superalloy materials – DM 247 (MAR M247) and DM 625 (Inconel 625). Since MAR M247 is non-

technique make it possible to print high-precision components using this and other non-weldable materials.

## More Digital Metal printers sold

The installed base of Digital Metal printers around the world is constantly growing. A large PM/MIM producer in Asia has just invested in a Digital Metal DM P2500 printer. By adding 3D printing to their current portfolio, the company will be able to provide their customers with a full scope offering for high-quality components.

Digital Metal printers have also recently been sold to Japan and the USA.

## Kill two birds with one stone

More and more of our customers find multiple uses for their machines. Moving from prototyping into serial production is an expected trend. But a novel combination is serial production of components for external customers while at the same time printing spare parts for internal use. The flexibility of Digital Metal binder jetting process allows simultaneous printing of different types of geometries in several layers in the same build box.

## Digital Metal – the movie now seen by more than 200,000

The Digital Metal technology is making great strides into territories previously ruled by conventional manufacturing technologies. Learn about some of its

## Digital Metal – Innovation of the Year

Digital Metal has won the category “Innovation of the Year” in the 2019 3D Printing Industry Awards. This is one of the largest surveys of the 3D printing industry. It was launched as a way of celebrating landmark innovations in additive manufacturing and 3D printing. The winners are selected by the readers themselves and this year over 80,000 votes were collected.

“We are honored to have received this award and truly glad that our efforts have been recognized by the industry”, says Alexander Sakratidis, Sales & Marketing Manager at Digital Metal. “We promise to continue to innovate, develop and improve our Digital Metal technology to make it even better.”
